

Familiar with using social media?

Facebook?

We need your help.

Cardiff University School of Medicine would like to set up a Facebook group to let people know about the work we do and the growing number of opportunities to get involved in the research and teaching activity of the school.

We are looking for members of the public aged 18+ to be a part of the project team to help us establish this group on Facebook.

Meetings will be held monthly and virtually (via Zoom) during the 12-months of the project and last up to one and half hours. Payment to cover time in meetings is available.

We would love your help with the successful creation of this Facebook Group which will involve:

- Coming up with a Group name;
- Facebook description;
- Ideas on consistent posting plans;
- Group guidelines; promotion and evaluation plans.

What we need is people with experience of:

- Using social media platforms particularly Facebook
- Being a member/admin/moderator of groups on Facebook.

Interested? Please get in touch with Sarah on **hatchs@cardiff.ac.uk** to arrange an informal chat and/or email a short paragraph detailing why you would like to get involved in this project opportunity.

Further information:

In the School of Medicine, the opinions and experience of members of the public are important to us and help us to shape future health research and train healthcare professionals of the future.

Through Public and Patient Involvement, Cardiff University School of Medicine works in partnership with members of the community to drive our research in areas that matter most to you, improving the lives of as many people as possible.

Sharing your personal experiences of living or caring for someone with healthcare conditions can also significantly enhance our training and assessment of our doctors of the future.

The aim behind this new Facebook Group is to keep an interested public informed of the latest developments taking place across the School of Medicine and let them know about the increasing number of opportunities that exist to support the work of the School.
