

Research Symposium Cancer Stem Cells, Resistance and Tumour Heterogeneity 6-7 September 2016, Julian Hodge Building, Cardiff

Day 1: Tuesday, 6 September 2016

09:00-09:20	Registration
09:20-09:30	Opening remarks
Session 1: Clarke's research legacy: past, present and future	
09:30-10:00	Mammary Stem Cells and Lineage Tracing in 3D Christine Watson, Department of Pathology, University of Cambridge
10:00-10:30	Genetic modified mice and understanding the origins of intestinal cancers Doug Winton, Stem Cell Biology of the Intestine Laboratory, University of Cambridge
10:30-11:00	Refreshment break
11:00-11:30	Wnt signalosome assembly by Dishevelled Marianne Bienz, MRC Laboratory of Molecular Biology, Medical Research Council, London
11:30-12:00	Translational work – a clinical perspective Tim Maughan, Department of Oncology, University of Oxford
12:00-12:30	The ARC research programme 2016 Karen Reed, European Cancer Stem Cell Research Institute, Cardiff University
12:30-13:30	Lunch
Session 2	
13:30-14:00	Preclinical model of lung squamous cell carcinoma using patient-derived xenografts Aliaksei Holik, The Centre for Genomic Regulation, Barcelona
14:00-14:30	Steven Pollard, MRC Centre for Regenerative Medicine, Edinburgh
14:30-15:00	Refreshment break
Plenary Session	
15:00-16:00	Owen Sansom, Beatson Institute for Cancer Research, University of Glasgow
16:00-18:00	Drinks reception and poster event
19:30-23:00	Delegate dinner, National Museum Cardiff

Day 2: Wednesday, 7 September 2016

Session 3	
09:00-09:30	Joana Paredes, IPATIMUP, Porto, Portugal
09:30-10:00	Geert Berx, Cancer Research Institute, Ghent, Belgium
10:00-10:30	James Lorens, University of Bergen

10:30-11:00	Simona Parrinello, MRC Clinical Sciences Centre, Imperial College London
11:00-11:30	Refreshment break
Session 4	
11:30-12:00	Jan-Henning Klusmann, Hannover Medical School
12:00-12:30	Katrin Ottersbach, MRC Centre for Regenerative Medicine, University of Edinburgh
12:30-13:00	Toby Phesse, European Cancer Stem Cell Research Institute, Cardiff University
13:00-13:30	Inke Nathke, University of Dundee
13:30-14:25	Lunch
Early-Career Research Symposium	
14:25-14:30	Introductory remarks Organising committee
14:30-14:45	Field Cancerisation in Transgenic HPV8 Mouse is related to LRIG1 Keratinocyte Stem Cell Expansion Simone Lanfredi, European Cancer Stem Cell Research Institute, Cardiff University
14:45-15:00	Axin1 and Axin2 function in Wnt Signalling, Stem Cell Maintenance and Differentiation Anika Offergeld, School of Biosciences, Cardiff University
15:00-15:15	SIRT6 hinders stemness of tumors bearing PI3K activation Rafael Maciel Ioris, Department of Cell Physiology and Metabolism, Faculty of Medicine, University of Geneva
15:15-15:30	Interactions with non-transformed neighbours determine fate of KRas-transformed cells in early pancreatic cancer William Hill, European Cancer Stem Cell Research Institute, Cardiff University
15:30-15:50	Nicola Ferrari, Institute Cancer Research London
Research Career Session	
15:55-16:05	Career at the interface between academia and industry Sameh Eid, BioMed X Innovation Center, Heidelberg, Germany
16:05-16:10	Opportunities for Early Career Researchers Cancer Research UK
16:10-16:15	Joaquin De Navascues Melero, European Cancer Stem Cell Research Institute, Cardiff University
16:15-16:30	Q&A session with panel
16:30-18:30	Networking reception

Please note that this is a draft programme and, as such, is subject to change.

Tickets for the Symposium cost £100 and can be [booked here](#).
